WORK EXPERIENCE

re:soft **Oct. 2025 – Present**

Full-Stack Developer

- Build the frontend of a full-stack pet-care e-commerce platform, covering the product catalog, checkout and user pet profiles.
- Integrated online payments with local bank cards, Apple Pay and Google Pay, and connected inventory, promotions and payment APIs to the UI for a working end-to-end checkout.
- Engineered product-variant and dynamic-filtering logic so the catalog scales to new product types without frontend rework.
- Rebuilt pages and components for a customer loyalty platform during its migration from Next.js to React + Vite, resolving the regressions the transition introduced.
- Collaborate with frontend, backend and product teammates, shipping in Agile sprints through feature branches, code review and CI/CD.

Freelance **Sep. 2024 – Sep. 2025**

Full-Stack Developer & Designer

- Designed, built and deployed websites and web apps for independent clients; handled data entry and managed client CRM systems, keeping pipelines and customer records accurate and up to date.
- Completed a digital marketing internship at Brandwise, an AI-powered martech company, researching audiences and producing campaign reports and content for social media and email campaigns.

Oxeni **Oct. 2022 – Sep. 2024**

Full-Stack Developer & UI/UX Designer

- Delivered 6+ websites and apps end to end for startups and small businesses, owning requirements, design, development and deployment.
- Worked directly with clients through requirements gathering, design reviews and iterative feedback rounds, turning their input into shipped features.
- Built a mobile app for a wearable personal-safety device and took it to a working prototype, one of the first products of its kind in the region.
- Developed a real-time sports-betting tracker on a third-party live-data API, plus websites for a business marketplace, an e-learning platform and a portfolio.
- Built a reusable component library and UI kit shared across client projects, cutting repetitive setup on each new build.
- Designed interfaces in Figma and implemented custom visual effects, such as glassmorphism, to give client products a distinctive, modern look.

artytechs **Dec. 2020 – Oct. 2022**

Junior Architect & 3D Visualization Artist

- Produced 3D renderings (Blender, Lumion, Twinmotion) and Archicad drawings for 5+ residential and commercial projects at an award-winning firm; most were built and some won awards.

EDUCATION

Georgian American University (GAU) **2015 – 2019**

Bachelor's Degree, Law
